SUMMARY

Founding Engineer who **designed and built the backend foundation** for GROWTH: a suite of 6 AI-powered MarTech products. Delivered ad copy generation, creative automation, video production, and campaign management end-to-end. Own full-stack execution from system architecture and API design.

- Built AI pipelines that **reduced campaign brief-to-launch time** from weeks to minutes, replacing manual workflows with automated creative generation at sub-60s latency.
- **Designed multi-tenant backend architecture** supporting 6 independent AI services under a unified platform balancing service isolation, shared infra, and cost efficiency.
- Translated ambiguous product requirements into production-ready AI systems in a **0-to-1 environment**.

PROFESSIONAL EXPERIENCE

Founding Engineer - Backend & AI Systems | GrowthZ AI, Gurugram, India July 2024 – Present

- **Engineered an AI-powered ad copy and creative generation platform** ingesting Play Store / App Store / website reviews to identify sentiment and themes, producing optimized ad copies with integrated keyword research, and generating static, animated, and video ad creatives delivering **production-ready assets at sub-60s latency**.
- Designed an **end-to-end campaign automation and optimization engine** auto-generating keywords, ad groups, match types, assets, and extensions via Google Ads API from a single URL input, and running real-time bid and structure adjustments using XG Boost-based ML models on live campaigns.
- Engineered a unified **performance analytics layer** aggregating multi-platform data, computing performance signals, and surfacing real-time insights across campaign creation, tracking, and optimization services through a single marketing dashboard.
- Engineered modular NestJS microservices with **RBAC, JWT auth, and multi-tenant architecture** reducing unauthorized access incidents by 95% and cutting client onboarding time by 60%.
- **Maintained scalable cloud infrastructure** using Docker, AWS (S3, SQS, Lambda), and Pulumi (IaC) achieving 99.9% uptime and reducing deployment errors by 80%.
- **Integrated GA4 and AppsFlyer** for unified attribution and reporting pipelines, ensuring consistent data flow.

Impact

- Independently built one of six beta products that opened a **new monetization channel** within three months of joining achieved 140% of quarterly variable & recognized as **Top Performer** for three consecutive months.
- Awarded **Emerging Leader Excellence Award** for cross-functional ownership, removing technical blockers, and driving predictable delivery timelines across product milestones.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, C/C++

Backend: Node.js, NestJS, Express.js, FastAPI

AI / ML: LangChain, LangGraph, Google Gemini 2.5 Flash, Imagen 3, Veo 3, Gemini Vision AI, XGBoost

APIs & Integrations: Google Ads API, GA4, AppsFlyer, Google Cloud AI Platform

Cloud & Infra: AWS (S3, SQS, Lambda, EC2, API Gateway), Docker

Databases: PostgreSQL, MySQL, MongoDB

Core Concepts: System Design (HLD/LLD), Multi-Tenant Architecture, Microservices, Event-Driven Systems

EDUCATION

B.Tech in Computer Science and Engineering

9.25 CGPA

SRM Institute of Science and Technology · Sept 2020 – Jun 2024
